CALL IN ASIA EUROPE AND USA to reconcile the facts

West 'must be reconciled with the loss of dominance "

Why Europe and the U.S. have such a problem to get out of the crisis? Some Asian scientists know the answer. - West is slow to accept the fact that the era of its domination is on the decline - Professor Kishore said Mahbub. Place of Europe and the U.S. has to take a new, growing out power - Asia.

A scientist from Singapore reiterated its argument while promoting the book "The New Asian Hemisphere - The Irresistible Shift of Global Power to the East" (in English - New Asian Hemisphere - Compelling the movement of global power in the East) in the Indonesian capital. Its publication came out already in 2008. - Then I encountered a huge resistance and assigned me a patch "anti-Western." But now the crisis, more and more people in the West realize that you need to adapt to inevitable change - said the scientist. For this reason, its publication now in Asia is experiencing a second youth. **Dawn East** Singaporean, who has been placed on the list of hundred most influential intellectuals of the world by the renowned journal "Foreign Affairs", argues that the West must quickly adapt to the rapid rise of Asia. - For your own good - he says. - Should pay attention to early warning, now would be better mentally prepared for this crisis - said Mahbub. According to the researcher, Asia slowly begins to dominate the world by mastering the "seven pillars of wisdom", which was once used to dominate the West Asian countries for two centuries. Among the key of wisdom mentioned the introduction of free market economy, focusing on science and technology and create an efficient system of law. In the similar vein, also spoke another Asian economist who, along with Mahbubanim he participated in a panel discussion promoting the book. Tony Prasetiantono of Gadjah Mada University (the oldest and largest in Indonesia) said that the unique culture of work and level of education of the Asian countries will allow them to become "a force which will need to be counted." mk // GAK / m
